

DR. LEOPOLDO BACCARO

The Face of Breast Augmentation

Dr. Leopoldo Baccaro is a board-certified plastic surgeon who specializes in aesthetic surgery of the breasts. Characterized by his enthusiasm, he has focused on going beyond the traditional approach of breast implant surgery. Known as the “hybrid” breast augmentation, Dr. Baccaro uses a combination of modern techniques, such as fat grafting and an internal bra, to create a beautiful décolletage and long-lasting results. The goal is to design “bra-less” cleavage, tailored to modern feminine fashion and our Floridian beach lifestyle.
